CO-ED COSTUME DANCE TO FEATURE PROGRAM

University Concert Band Wil Provide Music for

One of the many entertaining features of the Physical Education Exhibition, to be given in the Alumn gymnasium May 20, is the specia musical numbers and accompaniment furnished by the university concert band. The concert band is a select group of 40 musicians that have been furnishing the enjoyable twilight concerts on the university campus. Under the direction of Elmer G. Sulzer, special musical arrangements that promise to add color and interest to the performance have been made for the coming exhibition.

plenty of action. According to the program there will be 90 participants in these three activities, with a special feature of an individual boxing bout, wrestling match, and fencing match all going on at the same time. The people taking part this number have been working and practicing on the activities for the past four weeks and will un-doubtedly reach a point of high perfection by the time the event is

ence that like their entertainment a little more refined than the boxing and wrestling matches offer, a costume dance by 30 girls of the university promises to be one of the most colorful and artistic parts of the program. The dance, a pirate dance, has been in the process of development for the past six weeks, and with the flashing costumes, colored lighting effects, and spectacular dancing should be unusually attractive, especially to the male members of the audience.

In addition to the dancing, the women students of the university are participating in an act of pyra-mid building and acrobatics with the men students. ## "Made-to-measure" service for business

Whether the business is small or large the corner grocery or the refrigerator factory - requirements for telephone service vary. So, to meet special conditions, Bell System men custom-fit the service to the subscriber.

They worked out a telephone conference plan for a large manufacturer. Every Friday, at specified times, each district manager calls the home office, where telephone facilities are

so arranged that the chief sales executives are on the line simultaneously. Problems are discussed, decisions given. In minutes, the executives cover the country. This plan lowered selling costs, raised efficiency, helped the user to increase profits 31% in a year's time.

By making the telephone more useful, Bell System men contribute to the success of many industries.

## "ELECTRIC BULLETS"

\*HE result of exhaustive wind-tunnel tests of conventional trolley car models revealed that at speeds of 70 and 80 miles per hour, 70 per cent of the total power was consumed in overcoming air resistance. Streamlining saves approximately 20 per cent of the power.

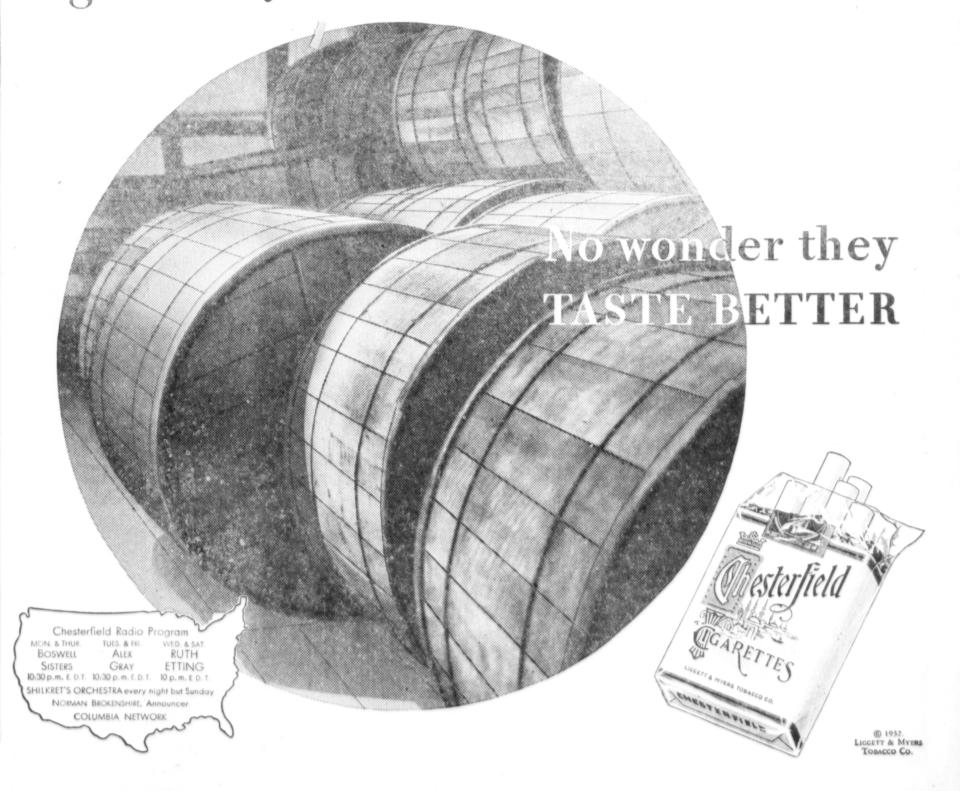

When the Philadelphia and Western Railway Company decided to replace its cars with faster and more efficient equipment, it chose "electric bullets"— new streamlined cars — each powered by 4 G-E 100-hp. motors. The cars, constructed of aluminum alloy, with tapered noses and tails, are much lighter in weight and capable of greater operating efficiency.

In developing transportation apparatus, college-trained General Electric engineers have conducted extensive tests to improve operating conditions. On land, on sea, and in the air, to-day's equipment is safer, swifter, more dependable, and more comfortable.
